

**DESCRIPTION**

MeCaSpray is the pneumatic cartridge spray system for Eutectic’s MeCaTec series of polymer coatings. This self-contained spray system is portable and lightweight for ease of use and control. It integrates a dual stage trigger making one handed operation possible.

The dual stage trigger allows atomizing air to flow to the nozzle first, before initiating material flow from the cartridge. Each two-component cartridge contains both resin and hardener, separated until ready to spray. This system provides precise mixing at the nozzle, when needed, avoiding waste and pot life concerns.

*Before applying MeCaTec products, please refer to the product Application Instructions.*

**MECATEC PRODUCT COMPATIBILITY**

MeCaSpray equipment is used with MecaWear and MeCaCorr cartridges. Each cartridge contains both Resin and Hardener.

- MeCaWear 300 - Part No. 8630300-C
- MeCaWear 350 - Part No. 8630350-C
- MeCaWear 700 - Part No. 8630700-C
- MeCaCorr 710 - Part No. 8630710-C
- MeCaCorr 750 - Part No. 8630750-C
- MeCaCorr 780 - Part No. 8630780-C
- MecaFix 144 - 8630144-C

FEATURES	BENEFITS
<b>Lightweight Design</b>	<ul style="list-style-type: none"> <li>Less worker fatigue</li> <li>Easy to control</li> </ul>
<b>Dual Stage Trigger</b>	<ul style="list-style-type: none"> <li>One handed operation made easy</li> </ul>
<b>Single Coat Application</b>	<ul style="list-style-type: none"> <li>Lower intercoat porosity</li> <li>Lower risk of intercoat failure</li> <li>Faster return to service</li> </ul>
<b>2 Component Cartridge</b>	<ul style="list-style-type: none"> <li>Easy to use</li> <li>No pot life concerns</li> <li>Precise mixing ratios</li> </ul> <ul style="list-style-type: none"> <li>Easy reload</li> <li>Minimum waste</li> </ul>
